D-THINK Toolkit Released!

The D-THINK toolkit is aimed for educators from Higher Education and VET Institutions, and is intended to be an active toolkit to support the use of Design Thinking as a method to:

- Renew their educational approaches and methodologies;
- Update and learn how to redesign learning experiences;
- Promote the acquisition of “new skills” like sense making, social intelligence, novel & adaptive thinking, cross cultural competences, trans disciplinarily, design mind-set and virtual collaboration, that nowadays employers and organisations seek.

The toolkit is not a textbook but a practical guide and handbook. It was conceived in a way to promote the application of the tools by educators in different and relevant educational contexts.
